Tricked-Out For Business™

Otherwise Impossible™

You provide complex end-to-end solutions, bridging various industries and technologies.

You stand behind them, from installation through repair; at the design phase, everything is at stake.

You've seen cabinets of all shapes and sizes; juggled questionable computers and iffy electronics.

You've never seen a computer-centric kiosk, designed to alleviate unique challenges;

a powerful, modern computer, forever upgradable, supporting any software, any hardware, and any peripherals.

oh, and optionally attractive too - you know, since that's usually important.

kioskStyle for Integrators

kioskStyle

PORTABLE

all-in-one lightweight touchscreen computer kiosk

360 mounting, desk/pedestal/pole/arm/cabinet, in-wall/on-wall/ceiling, just about anywhere ✦

easily relocated, removed, replaced, or re-arranged for short-term deployments; field-serviceable

POWERFUL

full range of multi-media capabilities to distinguish your software from your competitors

future-friendly, repeatedly upgradable to support the latest and greatest ✦

multi-function, multi-purpose, multi-tasking kiosks able to serve different purposes at different times, or present multiple campaigns concurrently ✦

high-performance and extensible to support any software and attached devices ✦

PUBLIC

cool n` quiet active ventilation for whisper-silent operation

match each kiosk to its location's decor with myriad colours, patterns, custom finishes, logo and branding artwork, easily cleaned with any common solvent or cleaning product ✦

prioritize physical safety by eliminating sharp corners - ESA, CSA, NEC approved

military-grade, durable aluminum construction, designed for reliable high-traffic public usage

FOR YOUR BENEFIT

- cheaper programmers, greater variety, better software
- designed for engineers, integrators, programmers
- connect to anything, extensible
- ground-up, computer-centric design
- approximately 55 lbs
- additional DC power available inside for your use
- additional interior space for multiple small components
- additional interior space optionally available
- lightweight shipping, efficient-volume storage

FOR THEIR BENEFIT

- swappable exteriors allow re-branding and re-purposing
- 22" landscape/portrait touchscreen accepts hand, glove, object/stylus input
- any colours, any logos, any wild branding, powder-coat, airbrush, textured airbrush, chrome
- up to 12 terabytes of hard drive storage
- more programming options; network manageable
- modern hardware, modern OS, Windows 7 and beyond
- it can do anything any computer has ever done
