Tricked-Out For Business™

Otherwise Impossible™

You maintain strict control over every machine in the building; well, except for those half-baked public machines in the lobby.

Call it a kiosk, call it a fancy box; we call it a public-facing workstation: serious specs, no compromises.

We're computer guys; the computer comes first.

Deploy IT, Manage IT, Secure IT;

Just like any other node on your network.

kioskStyle

PORTABLE

all-in-one rugged aluminum, touchscreen computer kiosk

360 mounting, desk/pedestal/pole/arm/cabinet, in-wall/on-wall/ceiling, just about anywhere ✦

easily relocated, removed, replaced, or re-arranged for short-term deployments

POWERFUL

full range of multi-media and peripheral capabilities to maximize your software performance

long life cycle, future proof upgrade path to support the latest & greatest ✦

high-performance and extensible to support any software and attached devices ✦

PUBLIC

cool n` quiet active ventilation for whisper-silent operation

match each kiosk's exterior to its location's decor with myriad colours, patterns, custom finishes, logo and branding artwork, easily cleaned ✦

military-grade, durable aluminum construction, designed for reliable high-traffic public usage

WE DO IT THE WAY YOU DO IT...

- normal, off-the-shelf, high-performance, ATX, components
- Core i5, i7, AMD, to match the rest of your fleet
- we recommend Windows 7 Pro 64, if your tools do
- upgradable, as you would expect a good machine to be
- RAM, HDD, SSD, so your software runs smoothly
- USB, ethernet, Bluetooth, eSATA, etc., peripherals abound

...TO MAKE YOU LOOK GOOD

- to the marketing department, with wild branding
- to the janitor, cleanable with any common solvent
- to the boss, it's reliable
- to the users, who'll never need to see you
- to enterprise tools, just like any node on your network
- to you, for "retiring" those half-baked machines in the lobby
